LeetCode | @saketh169

Professional Summary

Third-year CS student passionate about building things with MERN stack and diving deep into data science and ML. I code in Java, C, and Python, solved 400+ LeetCode problems, and consistently compete on HackerRank to keep my problem-solving skills sharp. I've built real full-stack web applications from scratch and genuinely enjoy working on impactful projects; looking to grow as a leader and contribute innovative solutions in tech.

Education

Indian Institute of Information Technology, Sri City <i>Bachelor of Engineering in Computer Science and Engineering – CGPA: 9.33</i>	Chittoor, Andhra Pradesh 08/2023 – 06/2027
Narayana Junior College <i>Intermediate / 12th Grade – Percentage: 98.7%</i>	Nellore, Andhra Pradesh 06/2021 – 06/2023
Sri Netaji MSR Pilot High School <i>10th Grade – Percentage: 100%</i>	Nellore, Andhra Pradesh 06/2010 – 06/2021

Work Experience

Full Stack Web Development & AI-Integrated Marketing Intern <i>Myna Seva Foundation</i>	07/2025 – 08/2025 <i>Virtual</i>
- Built websites using Google Sites, Blogger, Wix, and WordPress with foundational UI/UX skills - Designed strategic visuals with Canva to promote community initiatives and boost online engagement	

Academic Projects

Image Copy Detection for E-Commerce CNN, Siamese Network, DL @GitHub	12/2025 – Present
- Built image copy detection using CNN, CV, and Siamese network with 2 parallel CNNs for plagiarism detection - Attained 92% accuracy detecting fake sellers, tested with 1 lakh+ image queries	
Nutri Connect Web Application MERN, Render, MVC @GitHub	01/2025 – Present
- Full-stack web app developed with 5-member team for digital nutrition consultations - Features 30-min slot management system with 2-week advance booking and personalized diet plans	
Hybrid Load Balancing for QoS in Cloud AWS, Python @GitHub	09/2025 – 12/2025
- Developed hybrid load balancing algorithm combining Round Robin and ACO, improving efficiency by 40% - Tested scaling from 20-50 servers handling 100-2000 tasks with optimal QoS and reliability	
IoT-Based Smart Jacket with ML for Real-Time Analytics IoT, ML, Python @GitHub	09/2025 – 12/2025
- Integrated 6 sensors to wearable smart jacket monitoring heart rate, temperature, and activity using 3 Kaggle datasets - Delivered 95% accuracy in ML-based real-time anomaly detection with mobile and cloud alerts	

Technical Skills

Programming Languages: Java, C, Python
Web Development: HTML, CSS, JavaScript, EJS, MySQL, MERN Stack, Bootstrap, Tailwind CSS
Tools & Platforms: Linux, Git, GitHub, Matlab, Vercel, Render, AWS
Libraries: Pandas, Matplotlib, Seaborn, OpenCV
CS Fundamentals: Data Structures & Algorithms, Operating Systems, OOP, DBMS, Computer Networking, Cloud Computing

Certifications

- Web3 and Blockchain Summer School** – Web3SSH, IIIT Sri City (05/2025)
- Career Essentials in Generative AI** – Microsoft and LinkedIn Learning (06/2025)
- Python Fundamentals for Beginners** – Great Learning

Achievements

- Agentica AI Hackathon 2025:** Secured 1st Runner-Up for developing AI-Powered Intelligent Document Management System
- LeetCode:** Solved 300+ problems, earned 50-day and 100-day active streak badges in 2024 & 2025
- Campus Ambassador (Techfest, IIT Bombay):** Secured 172nd rank among top 1000 ambassadors with 7500 points
- CodeX (Gradient Club):** Achieved 11th place in competitive DSA Coding Competition
- Google Cloud Skill Boost:** Received exclusive goodies for completing advanced cloud technology labs

Co-Curricular Activities

Decoration Team Member Abhisarga Fest	02/2025 – 03/2025
Contributed creatively to enhance the visual appeal and ambiance of the college fest through innovative designs	
Independence Day Meraki Team College Event	08/2024
Worked on the decoration team for college Independence Day celebrations, creating a festive and patriotic ambiance
